

## **NCS launch the new Quick Mount III cabinet**

**After the successful launch of Quick Mount II cabinet, NCS is proud to announce the launch of Quick Mount III cabinet.**

Keeping all the selling features of the Quick Mount II version we have upgraded the cabinet with new features. The new cabinet dimensions are 800x800 and 42 HU.

The **existing successful features** of the Quick Mount range are :

**N340.003**

- Automatic earthing : all the metallic parts (doors, roof, frames and plinths) and our patch panels are automatically earthed via the structure  
Advantages : better accessibility and shorter installation time
- Up to 750 kg loading charge : suitable for heavy active material
- 2 standard frames with 4 cable management plates
- Only around 140 Kg when mounted
- Delivered in a kit of 6 boxes of maximum 45 kg : easy to handle also in rooms with difficult access ( basement,...)
- Assembly time : around 10 minutes with 8 screws only
- Up to 8 individual fans can be install
- Accessibility : all the doors and panels can be opened from 2 sides and can be removed in a few seconds
- Security : no side panels can be open from outside when front door is locked
- Front door has door handle equipped with euro lock system : easy to change the lock
- IP 20 as standard and can be upgraded to IP 30 by using an additional roof
- Additional plinth of 10 cm with 3 more cable entry holes
- Complete range of accessories

The **new features** of the Quick Mount range III are :

- Mobility of the frames: each frame can be assembled in 3 different positions : 6 different combinations are possible for enhanced flexibility
- 6 cable management plates in a new version where tie wraps and scratches can be used
- 2 extra holes in the roof to allow lateral cable entry
- Rear door with same door handle and euro lock system as front door.

The **new version is available from warehouse** and can be ordered under following part numbers :

- **Cabinet : N340.003**
- **Extension : N340.103**
