## New Connectivity Range Completes Nexans LANmark-OF Optical Fibre System

Nexans introduces a new complete range of LANmark-OF optical fibre connectivity. Combined with Nexans outstanding optical cables, this new connectivity supports campus and building backbones, horizontal cabling applications for Local and Storage Area Networks (LAN's and SAN's), device termination and data centres.

### Main benefits ...

- Reduced logistics costs – one panel for all connectivity formats
- Scalable – populate as required and expand when necessary

*Modular 'Snap-in' Patch Panel  
& Zone Distribution Box*

- Save installation cost – fast installation without the need for screws
- Flexibility – choice of SC, Dual SC, LC and MT-RJ couplers

*'Snap-in' couplers*

- Reduce costs with higher density patching
- LC & MT-RJ connectivity supported across the range (patch cords, pigtails, ...)

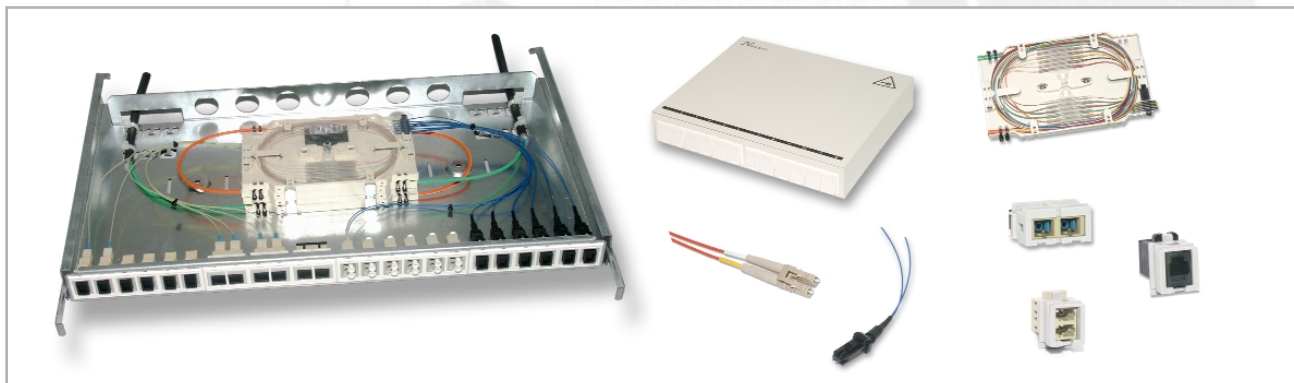

*Small Form Factor (SFF) support*

- Splice trays for tight buffer and loose tube cables
- Metallic and heat shrink splice protections / Anaerobic toolkit

*Complete range of accessories*

- Save installation costs
- Easier and faster field termination

*Anaerobic termination  
of connectors*

And much more ...
